SUMMARY

UX/UI and product designer with 1.5+ years at Dinetap across a consumer app, a merchant dashboard and POS: one product with several sides, like a super app. I design clean UI and clear flows, from wireframes to high-fidelity prototypes, including payment and wallet flows that feel safe, and I run token-based design systems. I also vibe code: three iOS apps of my own, built with React Native and Claude Code.

EXPERIENCE

Associate UX/UI Designer, Dinetap — Remote · Dec 2025 to Present

Consumer mobile app (B2C)

- Lead UX/UI for home, discovery, offers, prepay, wallet, receipts and ordering, with engineers and a product analyst.
- Ship Ready-to-Dev specs (states, edge cases, interaction notes) and high-fidelity prototypes for stakeholder and investor demos.

Merchant back office dashboard (B2B) and design system

- Designed the back office revamp and its design system from scratch: tables, filters, status chips and reporting, aligned to shadcn/ui.
- Own the token-based Figma system (light and dark, variants) shared by the React Native app and the web dashboard.
- Rebuilt the company website with Claude Code and Lovable, replacing Framer, improving structure, clarity and speed.

Intern UX/UI Designer, Dinetap — Remote · Apr 2025 to Dec 2025

- Restructured Home, Wallet and Scan/QR with a cleaner visual system, icons and consistent patterns.
- Designed POS features for iPad and tablet (choices and add-ons, pax selector, move items) with redlines and state tables.

Freelance Portrait Artist, Fiverr — Remote · Dec 2019 to Present

- 100+ portraits for clients worldwide, 4.9 rating, Level 1 Seller; briefs, revisions and delivery end to end.

SELECTED PROJECTS

RESEARCH CASE STUDIES

VELA E-commerce app · thesis
~300 surveyed across three generations, 9 interviews and a 60-person usability pilot shaped search and checkout.

TrustBank Mobile banking · thesis
Safer transfers: a review step before paying, shareable receipts and clear security alerts.

Keells redesign Grocery app concept
100,000+ LinkedIn impressions and 2,000+ reactions.

APPS I DESIGNED AND BUILT

Pouch Budgeting app · iOS
Built from 1,751 competitor reviews: no bank login, free, 13 languages.

Cloudia Owe-and-owed tracker · iOS
Say a sentence and it becomes cards. Website live.

Fretbelly Worry app · iOS
Shaped by ~45,000 App Store reviews: a reality check instead of streaks.

SKILLS

Design	UI design, interaction design, user flows, wireframing, prototyping, usability testing, accessibility (WCAG), localisation
Build	Vibe coding with Claude Code, React Native and Expo, websites hosted on Lovable and GitHub Pages
Systems	Design systems, tokens and variables, component libraries, responsive design, developer handoff (Figma Dev Mode)
Tools	Figma, Claude Code, ClickUp, Slack, Lovable, Framer, Jitter, Adobe Illustrator, Photoshop, Premiere Pro
Languages	English, Sinhala

EDUCATION

BSc (Hons) Industrial Information Technology — 2021 to 2025
Uva Wellassa University of Sri Lanka · GPA 3.74, First Class Honours

CERTIFICATES

Google UX Design Professional Certificate, Coursera — 2024
Adobe Creative Suite: Video Editing, ESOFT Metro Campus — 2017
