M. Sasanka Rasanjana

UX/UI and Product Designer

Colombo, Sri Lanka · 075 778 3809 / 076 267 8113 · sasanka.rasanjana29@gmail.com · Portfolio: sasanka-portfolio.framer.website · linkedin.com/in/sasanka-rasanjana

SUMMARY

UX/UI and product designer with 1.5+ years at Dinetap across a consumer app, a merchant dashboard and POS: one product with several sides, like a super app. I ground decisions in research (my thesis studied how three generations in Sri Lanka use mobile apps), design payment and wallet flows that feel safe, and run token-based design systems. I also build: three iOS apps of my own, coded with React Native and Claude Code.

EXPERIENCE

Associate UX/UI Designer, Dinetap — Remote · Dec 2025 to present

Consumer mobile app (B2C)

- Lead UX/UI for home, discovery, offers, prepay, wallet, receipts and ordering, with engineers and a product analyst.
- Ship Ready-to-Dev specs (states, edge cases, interaction notes) and high-fidelity prototypes for stakeholder and investor demos.

Merchant back office dashboard (B2B) and design system

- Designed the back office revamp and its design system from scratch: tables, filters, status chips and reporting, aligned to shadcn/ui.
- Own the token-based Figma system (light and dark, variants) shared by the React Native app and the web dashboard.
- Rebuilt the company website with Claude Code and Lovable, replacing Framer, improving structure, clarity and speed.

Intern UX/UI Designer, Dinetap — Remote · Apr 2025 to Dec 2025

- Restructured Home, Wallet and Scan/QR with a cleaner visual system, icons and consistent patterns.
- Designed POS features for iPad and tablet (choices and add-ons, pax selector, move items) with redlines and state tables.

Freelance Portrait Artist, Fiverr — Remote · Dec 2019 to present

- 100+ portraits for clients worldwide, 4.9 rating, Level 1 Seller; briefs, revisions and delivery end to end.

SELECTED PROJECTS

VELA, e-commerce app · thesis research case study

- ~300 surveyed across three generations, 9 expert interviews, a 60-person usability pilot.
- Search to checkout with failure recovery, dark mode and Sinhala and Tamil.

TrustBank, mobile banking app · thesis research case study

- OTP states, Face ID, a review step before every transfer, shareable receipts and actionable alerts.

Keells app redesign · concept

- Shared on LinkedIn: 100,000+ impressions, 2,000+ reactions.

Pouch, budgeting app for iPhone · designed and built solo

- Grouped 1,751 competitor reviews from 12 countries; 47% of one-star reviews were bank sync or pricing, so Pouch needs no bank login and is free.
- Widgets, 13 languages, 280 automated tests.

Cloudia, iOS app · designed and built solo

- Tracks what you owe and are owed; say a sentence and it becomes cards. Local-first, dark mode, website live.

Fretbelly, iOS app · designed and built solo

- ~45,000 reviews and ~11,000 screens studied; a worry app with a reality check, not streaks.

SKILLS

Product	User research, usability testing, user flows, wireframing, prototyping, interaction design, accessibility (WCAG), localisation
Systems	Design systems, tokens and variables, component libraries, responsive design, developer handoff (Figma Dev Mode)
Tools	Figma, Framer, Jitter, Adobe Illustrator, Photoshop, Premiere Pro, Claude Code, Lovable, React Native and Expo, Notion, ClickUp, Slack
Languages	English, Sinhala

EDUCATION

BSc (Hons) Industrial Information Technology, Uva Wellassa University of Sri Lanka — 2021 to 2025 · GPA 3.7

Google UX Design Professional Certificate (Coursera), 2024 · Adobe Creative Suite Video Editing, ESOFT Metro Campus, 2017
